## PROJECTS

### AccelERP

[Technologies Used - HTML, CSS, Tailwind CSS, Bootstrap, JavaScript, Firebase]

- Implemented ERP system facilitating seamless upload/download of personal and educational data for over 1400 campus users.
- Established secure access using RBAC system with Firebase for administrators and students on campus.

### GreenWay

[Technologies Used - HTML, CSS, Bootstrap, JavaScript]

- GreenWay is a fully responsive e-commerce website offering a curated selection of sustainable and eco-friendly products.

### QR Scanner

[Tool Used - Figma]

- Designed and deployed a QR scanner user interface that enhanced scanning speed, enabled seamless integration with existing systems, and improved user experience through intuitive design features.

### GeoTag

[Tool Used - Figma]

- Designed and launched a Geo Tag UI that enabled precise location tagging, resulting in improvement in data accuracy and reducing manual data Entry time.

### PDF Maker

[Tool Used - Figma]

- Engineered a PDF maker tool that converted documents with accuracy, reduced processing time, and included features for customizable templates and batch processing

## INTERSHIPS

**UI UX Designer Intern**

**Duration : 3 months**

**Company : Atmega Technologies LLP (Onsite)**

- Collaborate closely with our design team and stakeholders to understand project requirements, conduct user research, and translate findings into intuitive, visually appealing designs.
- Utilize industry-standard tools to create prototypes and iterate based on feedback from usability testing and design reviews.
